

When It Comes to Data Quality, The Secret is All in the Ingredients

Media Source Solutions awarded for our demographic & multi-cultural data

Data that's recent, relevant and accurate can make the difference between mediocre results and a stellar campaign. Luckily you'll no longer have to worry about your marketing campaign falling flat. According to independent data validator, Truthset, **our consumer data is amongst the best in the business**, particularly for multi-cultural data, age & gender data, income data and location data.

Plus we've been recognized by the ANA's AIMM and have been awarded a badge for transparency in multi-cultural marketing, thanks to our quality ethnicity data.

Why choose Media Source Solutions' data?

Multi-Cultural Data

We excel in determining Hispanic, African-American, and Asian consumers.

Age & Gender Data

Our age & gender data out-performs that of leading data providers. In Q4 2020 we came top for young adult data aged 18-24.

Household Income Data

We have high-quality data for marketers who want to target by income. We performed especially well in identifying wealthy households with an income over \$100K.

Location Data

We can pinpoint a consumer's state, region, and city in the US with precision.

How we ensure data quality

- All sources are audited for compliance
- All data is cross-verified against multiple sources
- All data is matched on name and postal address
- All data is validated with 5+ declared touch points
- All data is cleansed for hygiene

Improve your marketing campaign performance - discover quality data for yourself today!
